SUTI Changes in documentation

Changes in documentation made 2004-11-18 (v.1.0.2)

1. Document"SUTI_Inforamtionselement_1_0_1.xls" has been dropped from version 1.0.2. Document is fully replaced by XML schema"SUTI_MessageXSD_1_0_2.xsd".

2. The word "Address" was spelled as "Adress" in "SUTI_MessageXSD_1_0_2.xsd". This is changed into "Address" in this version.

3. <adressPosition> changed to <addressLocation>. Position is from this version used to indicate the seating in a vehicle. To indicate a geographical point Location will be used.

4. <economyType> : <price> is changed to optional.

5. <payment>: <idCurrency> is changed to idType.

6. <contents> : <resourceContent> and <economyContent> are changed to Optional.

7. <idAddressName>, <idCommunity> and <idStreet>
has been added to <addressType>. All are type idType.

8. A new message 2040 Order Linked has been added. It is used to indicate that several orders has been linked into a separate order and are sent by the Service Provider to the Client. The client is free to use this information in future references to these orders. With this information the Client can make alterations in a separate order in this linked order or make alterations to the complete set of orders. <orderLink> added to XML schema. Message 2040 replaces message 5040 showed in SUTI

9. <vehicleStartPosition> added to <resourceOrder > under <order>. This makes it possible to dispatch a vehicle from a location separated from the first pickup point.

10. Message 5020 Request for Location has been changed. In the new version it is possible to request both a single position as before. But it is also possible to order a tracking of a vehicle. To do that a new tag, <locationRequest> is added. In <locationRequest> it is possible to add starting time, ending time, time interval in seconds and distance interval in meters.

11. Message 5021 removed from block 40.

12. In "SUTI_Meddelande_1_0_1" message 5020 and 5021 referred to message 4030. Message 4030 is moved to block 70 and called 7031. This is corrected in this version.

13. Document" SUTI_MessageSchema_1_0_1.doc" has been dropped from version 1.0.2. Document is fully replaced by XML schema"SUTI_MessageXSD_1_0_2.xsd".

Changes in documentation made 2005-01-17 (v.1.0.3)

1. <orgProvider> added to <order>. orgProvider is used to identify the company that is
    the service provider for the specific order in the case where the receiver of the
    document is handling orders from more than one service provider.

    orgReceiver   +----- orgProvider 1
                         |------ orgProvider 2
                         |------ orgProvider 3

Changes in documentation made 2005-02-07 (v.1.0.4)

1 <order> <resourceOrder > <vehicleStartPosition> has been renamed <vehicleStartLocation>. From now on "Position" is a reserved word that describes a certain seat (position) in a vehicle.

2 <addressType> : <geographicLocation> is changed to optional.

Changes in documentation made 2005-08-15 (v.1.1.0)

The Swedish document "Kvarstående ändringar YYYYMMDD" has been replaced by an English document "Remaining alterations YYYYMMDD".

The Swedish document "SUTI_Meddelande_1_0_4" has been replaced by an English document "SUTI_Messages_1_x_x".

A new document added, "RequestForSutiLinkRegistration_1_1_X". The document is used to register a new SUTI-link.

A new document added, "SUTI_Description of SUTI Id_1_1_x". The document describes how to make a complete SUTI Id and how to register a new link.
